

WHY MARION?

COMMERCIAL TRUCK BODIES

AT MARION BODY WORKS, WE DELIVER WHEN WE SAY WE'RE GOING TO DELIVER.

At Marion Body Works, we deliver when we say we're going to deliver. In fact, our **on-time delivery rate is over 92%**. The industry estimated cost to your company is approximately \$2,000 each week your order is late! Marion tailors the process to your timeline and provides a customer intimate approach from beginning to final, on-time delivery.

ONCE A CUSTOMER, ALWAYS A CUSTOMER.

We're not a large corporation just filling orders. We're hardworking, passionate people, driven to exceed your expectations. You'll experience the highest quality with every truck body you receive and within every product that bears our name. The value we place on customer experience allows us to nurture lasting relationships and ultimately maintain our **90% repeat customer rate**. After all, it's your truck. Your satisfaction is our main concern.

LOW WARRANTY CLAIMS REFLECT MARION'S DEDICATION TO QUALITY.

Beyond price, we choose vendors based on quality, warranty and service, so every component meets our very high standards, and yours. Marion Body Works will never compromise quality which is why **warranty claims make up only 0.5% of our sales**. Marion truck bodies are built one way: the right way.

REAR FRAME STRUCTURE PROTECTS THE LIFESPAN OF YOUR TRUCK.

Marion trucks are built to last; thanks to careful consideration in the locations where it matters most. Marion Body Works has devised **a threshold 100% stronger than industry standards.** Its superior strength anchors the rear frame, supports dock extensions and liftgates, and stands up to forklift pounding. The tougher the truck, the longer the lifespan.

MARION TRUCKS ARE BUILT TO OUTLAST THE COMPETITION.

Seven vertical posts create **the industry's strongest front wall.** Aerodynamic extruded aluminum corner posts, top front radius and cast aluminum corner caps provide protection from weather and tree limb abuse. Marion trucks outperform the highest standards ultimately keeping your fleet stronger and longer running than the competition.
