**RESCUES**

# WALK-AROUND

## WALK-AROUND

- **Reliable construction** – All-aluminum means lighter weight, greater payload capacity and unmatched rust resistance
- **Superior storage** – A key to a great Rescue is its storage abilities
- **Smart roof tops** – A recessed walkway, with an extension, allows for safe egress up and down; plus, a welded tread plate roof with 100% welded seams makes the roof strong and weather-tight
- **Convenient Reels** – reels are located above the door openings, out of the way, or in rooftop compartments; and all roller guides are included as standard with all reels

# WALK-IN

## WALK-IN

- **Sweep-out compartments** – Enjoy ultimate strength when heavy equipment is dropped on the compartment edge and slid in; the floor is 100% welded to the threshold for a truly sweep-out design
- **Sturdy cabinets** – Made of aluminum, instead of wood or Formica, these interior cabinets won't easily chip or be scratched
- **Seamless interior walls and ceiling** – This feature minimizes areas in which dirt or bacteria can collect; Kemlite is tough enough to handle high-pressure hot water cleaning

# RESCUE PUMPER

## RESCUE PUMPER

- Up to 1,000-gallon tank
- Enclosed pump panel
- Full-width rescue style hosebed
- Pump compartment built as part of the body
- Customizable storage options, hose load options

# COMBINATION RESCUE

## COMBINATION RESCUE

- **Easily move through your truck interior** - Cab-to-body walkthrough, interior headroom 69"-78"; custom equipment mounting; multiple command center options
- **Store items where you need them** - Our side compartment walls are double wall design to allow wiring and components to be recessed; no exposed wiring
- **Gain access to your truck how you want** - With extruded flush-mounted or roll-up doors; single side entry

# RESCUE SQUAD

## RESCUE SQUAD

- Crew seating with storage
- HVAC can be provided for rehab on scene
- Capacity to integrate complex A/V, network, and radio systems
- Customized for any level of response, with the ability to configure your interior to maximize storage and user capabilities

# ADDITIONAL RESCUE

## ADDITIONAL RESCUE

- **Customize more with a Marion** - Multiple compartment depth layouts available; wheel well, overhead and slide out oil dry hoppers; custom tool and component mounting; multi-directional tool storage ideas
- **Industry-leading warranties** – We provide a standard 2-year bumper to bumper warranty
- Marion has a long history of building Rescues. Customize your Rescue to fit any application; **EOD response, HazMat response, air & light support, dive rescue, heavy duty rescue, incident command, tactical response, and urban search & rescue.**
